

# CAPTURE, STITCH, STORE & STREAM 360° VIDEO AND GEOSPATIAL DATA IN REAL TIME

*Comprehensive Intel Collection & Analysis Capabilities Resulting in Total Situational Awareness for the Warfighter*

## COLLECTION

Achieve a variety of intelligence collection in one, simple package. Camera adaptability allows for collection activities to match the hardware and posture of your environment. With configurations for land, sea and air vehicles, the capture capabilities can suit nearly any mission need.

## ANALYSIS

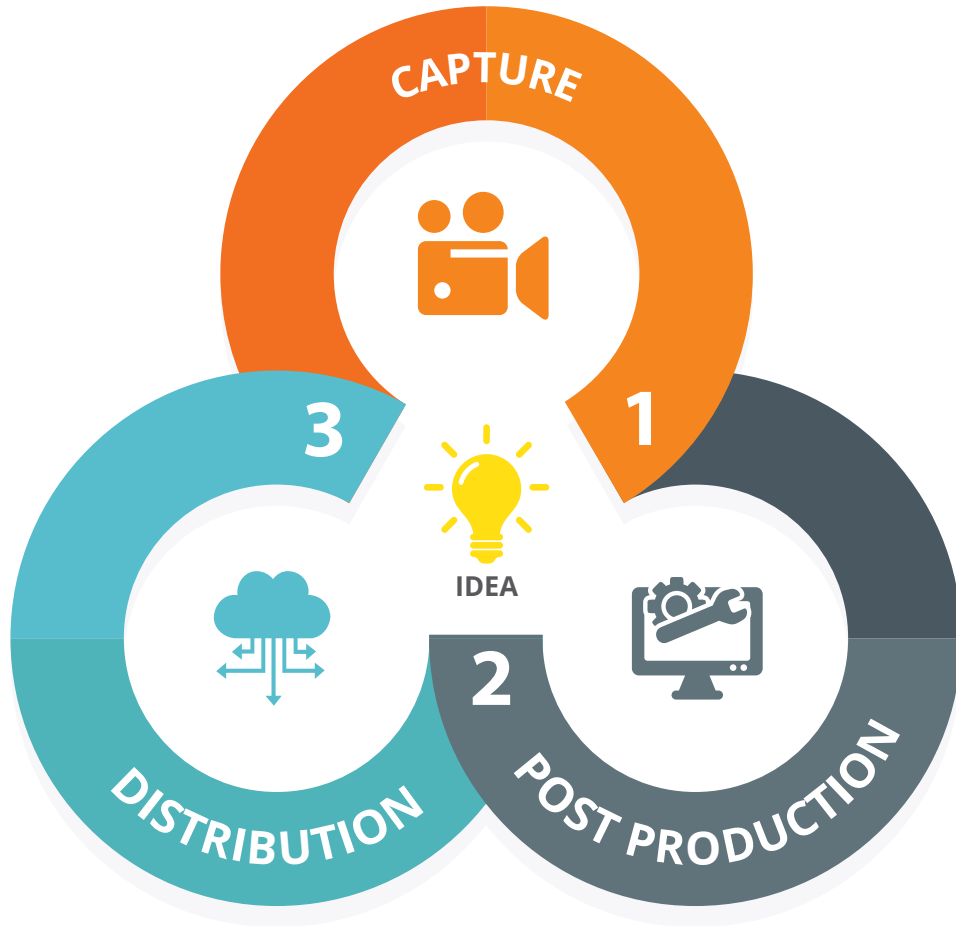

With a browser based UI and standard data export formats, there is no proprietary software to install or complex user training. Analysts and key decision makers can spend more time examining the data and its impact. The turnaround time of intelligence products will be faster and more accurate.

## DISSEMINATION

Livestreaming allows key leaders to make better, faster decisions for the warfighter's efforts. Cloud computing makes this possible from any device, anywhere in the world utilizing sufficient network connections. And with VR headset integration, analysts can experience the "presence" of frontline activity like never before.
